## The "Hawthornden" Collection of Orchids.

### THE ENTIRE COLLECTION.

We are pleased to be in a position to offer this well-known Collection, which has been in formation under the personal care and taste of M. Robinow, Esq., for over twenty years.

Mr. Robinow for some time has not been in good health, and finding he could not continue to devote his personal attention to his plants, decided to dispose of the whole Collection.

Many of the plants have been purchased in flower at most of the important shows, and although records have not been kept, many really first-class varieties will be found amongst the plants.

Mr. Robinow has always had a great taste for the more curious and rare species, for which the Collection is noted, besides which Mr. Robinow's exceptional opportunities for acquiring South American Species has notably enriched the Collection with many plants which we believe are unique.

As an example, we may mention the magnificent plants of *LYCASTE SKINNERII ALBA*, which have been in the Collection years, and have long been the envy of Northern connoisseurs.

The plants have been carefully catalogued and described, and having bought them at a very low price, we are giving our patrons the advantage of acquiring these plants at extremely low prices, more particularly as the space in our houses being limited, we must clear these plants out immediately.

---

**We Guarantee all Names, Species, and Descriptions to be Correct.**

LYCASTE SKINNERI ALBA

1 MASD MACRURA

2 MASD CHIMERA

Lot.

£ s. d.

36	<b>LYCASTE SKINNERII ALBA.</b>	These are absolutely the finest plants and varieties of this lovely white Lycaste ever offered for sale. They are selected out of a quantity of this variety sent direct by friends to Mr. Robinow. Nothing but the purest white and best shaped flowers have been kept, the others having been disposed of from time to time as they have flowered. Although many persons have tried to purchase these plants and varieties, money has never been able to draw them from their late owner. We ourselves have had our eye on them for some years. Unique specimen, 10 gigantic bulbs, and 4 extraordinary strong young growths. This plant carried 57 flowers and buds at the same time last year, and even more may be expected this year	...	...	...	52	10	0

50	"	Very fine plant, 12 leaves ...	0	7	6
51	<b>Chelsonii.</b>	A very pretty hybrid, between M. Veitchiana and M. Amabilis. Grand plant, 20 leaves, sending up flower buds ...	0	5	0
52	"	<b>Superba.</b> Fine plant, 12 fine leaves, sending up flower buds ...	0	7	6
53	<b>Chestertonii.</b>	A very rare species. Sepals strictly ovate, having abrupt tails of equal length, covered and bordered with very small and numerous acute black warts, greenish sulphur coloured, with black tails, black border, and numerous black spots. Lip transversely reinform, with two trapezoid low valves on the stalk, covered with radiating keeled veins, ochre and reddish; column arched, ochre, with a few brownish red spots. Fine plant, with 20 leaves ...	1	5	0
54	"	Nice plant, with 9 leaves ...	0	15	0
55	<b>Courtauldiana.</b>	A pretty hybrid between M. Rosca and M. Shintleworthii. The flower is very intermediate in character; in colour inclining towards M. Rosca, but in shape it more resembles its other parent. Grand plant with 11 fine leaves ...	1	5	0
56	<b>Calura</b> (Very Rare).	Strong plant with 14 leaves ...	0	7	6
57	"	Good plant, with 8 leaves ...	0	5	0
58	<b>Cucullata.</b>	A rare species, having one-flowered peduncles 5 inches high and a large broad bract. The lateral segments are not much larger than the odd one; triangular in their free part; prolonged into tails, which surpass their length; the cup is whitish-ochre; apex of tail yellow, all other parts darkest blackish-purple; glossy. The flowers with tails exceed 2 inches in length. Very fine plant, 5 strong leaves ...	1	11	6
59	<b>Chimæra.</b>	Very fine plant, 16 strong leaves ...	0	7	6
60	"	Fine variety, dark chocolate. Good plant, 9 leaves, sending up flower buds ...	0	7	6
61	<b>Backhouseana.</b>	Very fine variety. The largest of the section. Fine plant, 6 strong leaves and flower spike ...	0	7	6

65	<b>Demisa.</b>	Very fine plant. 20 fine leaves ...	0	7	6
66	<b>Elephanticeps.</b>	A grand species of a bold and striking character. Peduncles are a foot high bearing a solitary horizontal flower, 4 inches long, of a peculiar form, and which has been compared to an elephant's head. The lower sepals are of a dark rich crimson-purple; pale purple on the outer side, united for about one-third of their length. The tails are yellow on the inner surface, and greatly curving upwards; the upper sepal, which stands nearly parallel to the lower one, is bright yellow; lip is small, obtusely rhomboid; its front half densely papellose. Grand plant, with 9 fine leaves ...	2	12	6

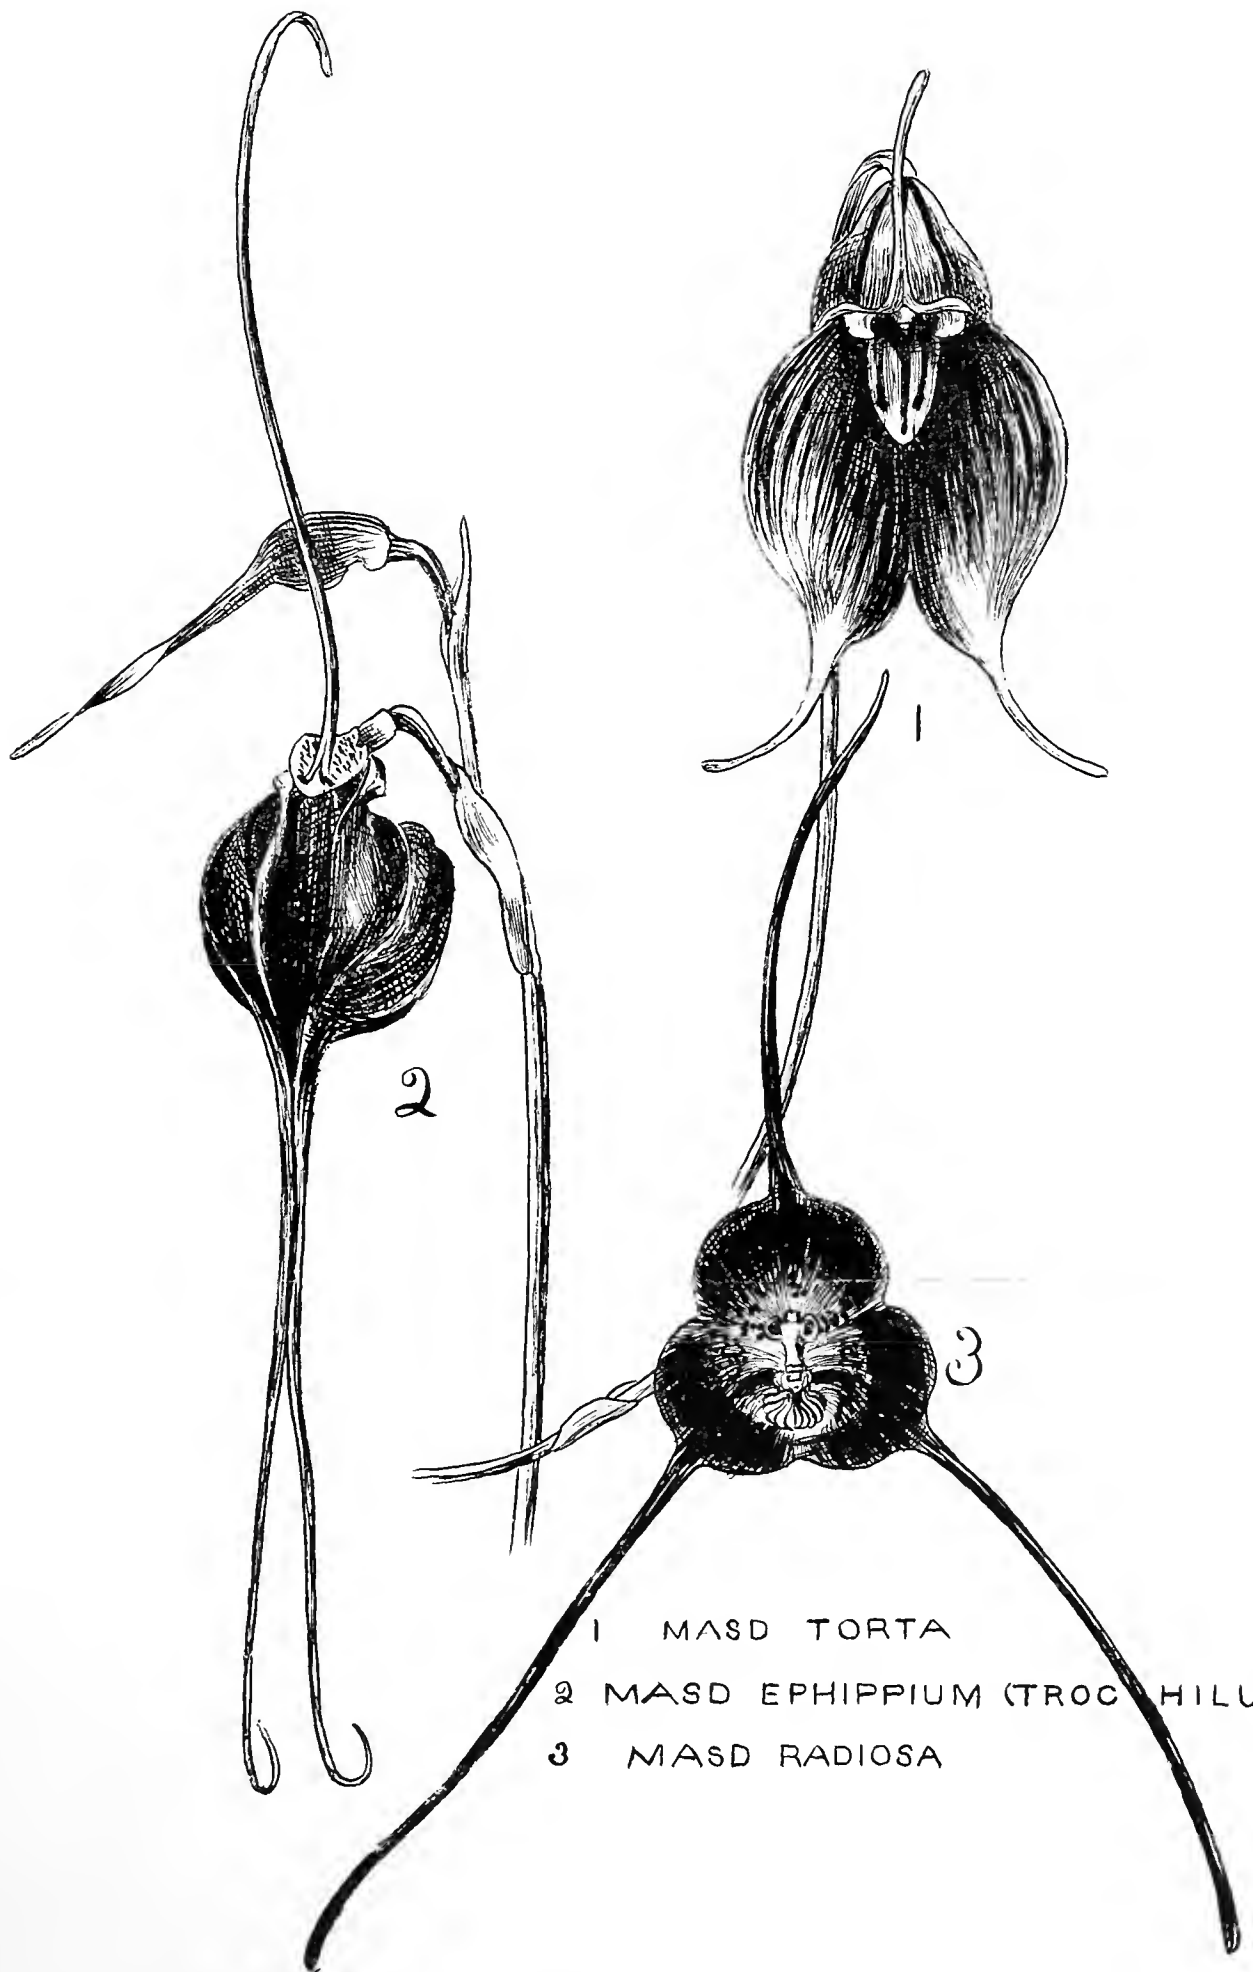

Lot.			£	s.	d.	
67	<b>Masdevallia Elephanticeps.</b>	Very fine plant, 3 very fine leaves ...	1	5	0	
68	„ <b>Fulvencens</b> (Rare).	Good plant, 7 fine leaves ...	0	15	0	
69	„ <b>Falcata</b> (Veitchii x Lindenii).	Grand plant, 30 fine leaves .	0	15	0	
70	„ <b>Gaskelliana.</b>	A very elegant species; peduncles are one to three flowered. The outer surface of the sepaline cup is purple-mauve, with two yellow areas on the interior base and apex of the lateral sepals. Tails longer, mauve purple on both sides. Inside the cup is light yellowish, hairy, full of mauve spots. Petals purple-mauve; bivalved in the usual manner at the top, and these with acute asperities. Lip calcolar, narrow, long (as in Masdevallia Backhousiana), with one chief longitudinal keel, and one on each side; light yellow. Column light yellow, with a very long beak. Fine plant, with 12 leaves ...	1	5	0	
71	„ <b>Gemmata.</b>	The flowers of this interesting species are of a rich brown-purple, with orange tails; some parts of the base are orange too, with brown nerves. Petals are ovate, with three very obscure teeth at the apex. Lip triangular-acuminate, cordate at the base, column sulphur at the upper half. Good plant, with 30 leaves ...	0	10	6

PAPHINIA GRANDIS

PHALÆNOPSIS SHILLERIANA

# THE ENTIRE COLLECTION OF ORCHIDS

FORMED BY

EDWARD H. WOODALL, Esq.,

St. Nicholas House, Scarborough.

---

This celebrated Collection of Choice Plants has been in formation during a long period, and every care has been personally exercised by Mr. WOODALL in selecting the choicest and rarest species.

Many Plants in this Collection are of such rarity that they are seldom to be purchased, and are only to be found in the most select Collections.

The majority of the Plants have been seen in flower by Mr. WOODALL before purchasing, and it is universally known with what care the Collection has been brought together.

Mr. WOODALL has always taken a deep interest in Horticulture, and has many times shown before the Royal Horticultural Society fine examples of his successful culture, where they have been greatly admired and received numerous awards, both for culture and variety; his VANDA CÆRULEA's and DISA GRANDIFLORA's may be mentioned as examples, and it is only to be regretted that in consequence of his being advised to reside in a milder climate he is giving up his Orchids.

As with Mr. ROBINOW's Collection we have priced these Plants, at extremely Low Prices, not having room to keep them, and are sure that both Collections will be rapidly disposed of.

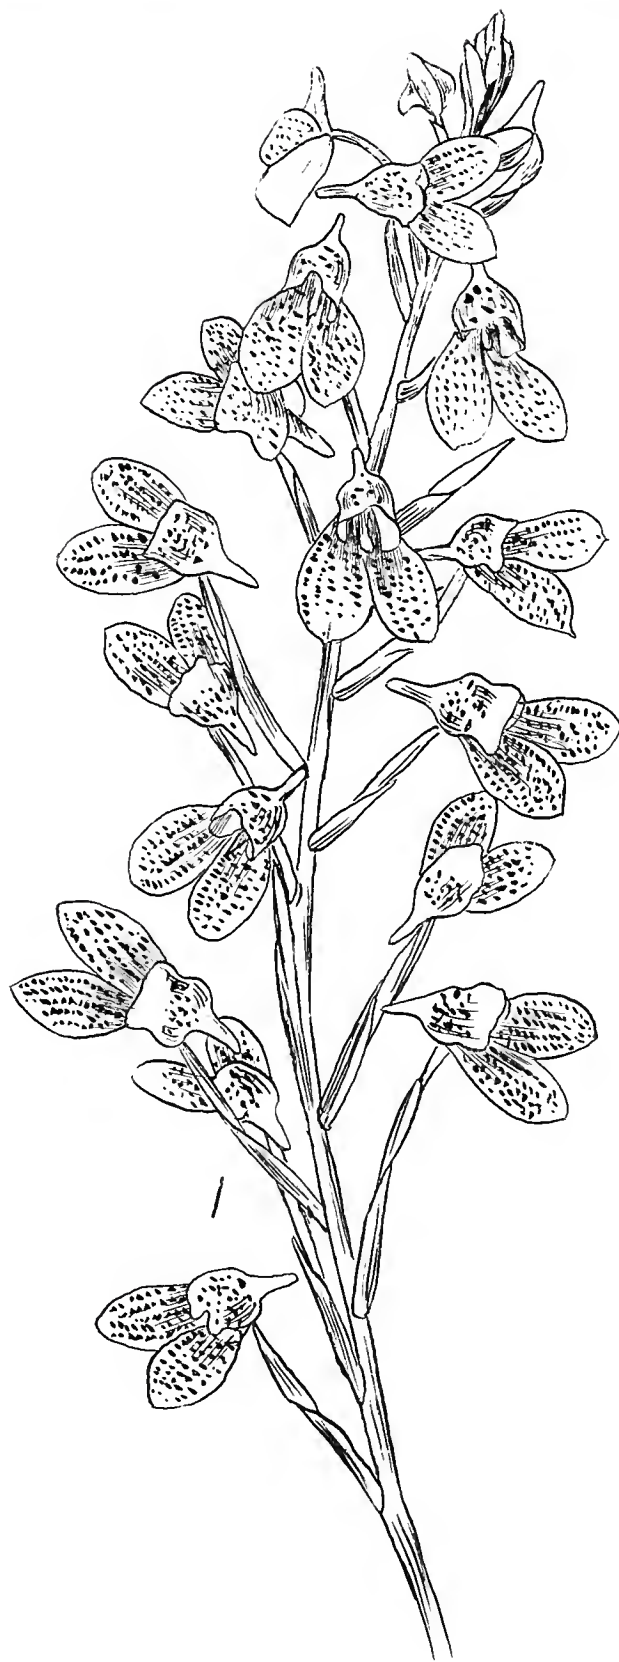

# COOL HOUSE ORCHIDS.

## MR. WOODALL'S COLLECTION.

Lot			£	s.	d.

The following are perhaps the most wonderful Plants of *Vanda Cœrulea* ever seen. Mr. Woodall made this lovely Orchid a speciality, and has received several awards for them, when shown before the R.H.S. Committee, where they have always been admired. To see them in flower together, is a sight not easily forgotten.

1300	<b>VANDA CÆRULEA.</b>	Wonderful specimen; the whole of the plant, with the exception of 1 growth, is the same as Painting No. 2, to be seen on application. Magnificent specimen, 10 very fine growths, counting 17, 17, 22, 20, 16, 12, 17, 13, 10, and 8 fine leaves. This plant is in flower at present and is a perfect sight	...	...	...	14	14	0
1301	„	„ Magnificent specimen, 11 fine growths, 19, 20, 13, 15, 10, 13, 8, 9, 17, 12, and 9 leaves, showing now 6 strong flower spikes, will probably show more. This plant received a Cultural Commendation	...	...	...	15	15	0
